Page CO2

Papers

2 Modeling the hepatic arterial buffer response in the liver
Original Research Article
Pages 1053-1058
Harvey Ho, Keagan Sorrell, Adam Bartlett, Peter Hunter

3 Ensemble empirical mode decomposition based feature enhancement of cardio signals
Original Research Article
Pages 1059-1069
Artūras Janušauskas, Vaidotas Marozas, Arūnas Lukoševičius

4 Complexity of the autonomic heart rate control in coronary artery occlusion in patients with and without prior myocardial infarction
Original Research Article
Pages 1070-1078
R. Magrans, P. Gomis, P. Caminal, G.S. Wagner

5 Vibrational dynamics of vocal folds using nonlinear normal modes
Original Research Article
Pages 1079-1088
Alan P. Pinheiro, Gaëtan Kerschen

6 Validation of a digital mammographic unit model for an objective and highly automated clinical image quality assessment
Original Research Article
Pages 1089-1096
Hector Perez-Ponce, Christian Daul, Didier Wolf, Alain Noel

7 Dynamic modeling of the outlet of a pulsatile pump incorporating a flow-dependent resistance
Original Research Article
Pages 1097-1104
Huan Huang, Ming Yang, Shunjie Wu, Huogen Liao

8 New approach for T-wave peak detection and T-wave end location in 12-lead paced ECG signals based on a mathematical model
Original Research Article
Pages 1105-1115
9 Probabilistic finite element predictions of the human lower limb model in total knee replacement
Original Research Article
Pages 1116-1132
C.T.C. Arsene, B. Gabrys

10 Precordial acceleration signals improve the performance of diastolic timed vibrations
Original Research Article
Pages 1133-1140
K. Tavakolian, F. Khosrow-Khavar, B. Kajbafzadeh, M. Marzencki, A.P. Blaber, B. Kaminska, C. Menon

11 Reconfiguration of the upper extremity relative to the pushrim affects load distribution during wheelchair propulsion
Original Research Article
Pages 1141-1149
Joseph M. Munaretto, Jill L. McNitt-Gray, Henryk Flashner, Philip S. Requejo

12 Comparison of electrocardiogram aVR QRS metrics, as indices of the sums of leads I and II, and all 6 limb leads
Original Research Article
Pages 1150-1154
John E. Madias, Richard E. Gregg

13 Commanding a robotic wheelchair with a high-frequency steady-state visual evoked potential based brain–computer interface
Original Research Article
Pages 1155-1164
Pablo F. Diez, Sandra M. Torres Müller, Vicente A. Mut, Eric Laciar, Enrique Avila, Teodiano Freire Bastos-Filho, Mário Sarcinelli-Filho

14 Influence of tool geometry on drilling performance of cortical and trabecular bone
Original Research Article
Pages 1165-1172
G.J.M. Tuijthof, C. Frühwirt, C. Kment

15 Is there any information on micro-structure in microwave tomography of bone tissue?
Original Research Article
Pages 1173-1180
R.M. Irastorza, C.M. Carlevaro, F. Vericat

16 Determination of peak deflections from human surrogates using chestbands in side impact tests
Original Research Article
Pages 1181-1187
Narayan Yoganandan, John R. Humm, Frank A. Pintar, Dennis J. Maiman

17 Bivariate piecewise stationary segmentation; improved pre-treatment for synchronization measures used on non-stationary biological signals
Original Research Article
Pages 1188-1196
Jérémy Terrien, Guy Germain, Catherine Marque, Brynjar Karlsson
