Review

From mechanical stimulus to bone formation: A review
Pages 719-728
Natacha Rosa, Ricardo Simoes, Fernão D. Magalhães, Antonio Torres Marques

Regular Articles

Accuracy assessment of 3D bone reconstructions using CT: an intro comparison
Original Research Article
Pages 729-738
Emily A. Lalone, Ryan T. Willing, Hannah L. Shannon, Graham J.W. King, James A. Johnson

Development of a non-invasive diagnostic technique for acetabular component loosening in total hip replacements
Original Research Article
Pages 739-745
Abdullah A. Alshuhri, Timothy P. Holsgrove, Anthony W. Miles, James L. Cunningham

Effect of different radial hole designs on pullout and structural strength of cannulated pedicle screws
Original Research Article
Pages 746-751

A model of lung parenchyma stress relaxation using fractional viscoelasticity
Original Research Article
Pages 752-758
Zoujun Dai, Ying Peng, Hansen A. Mansy, Richard H. Sandler, Thomas J. Royston

Biomechanical properties of the Marfan’s aortic root and ascending aorta before and after personalised external aortic root support surgery
Original Research Article
Pages 759-766
S.D. Singh, X.Y. Xu, J.R. Pepper, T. Treasure, R.H. Mohiaddin
Evaluating the effect of increasing ceramic content on the mechanical properties, material microstructure and degradation of selective laser sintered polycaprolactone/β-tricalcium phosphate materials
Original Research Article
Pages 767-776
Heather Doyle, Stefan Lohfeld, Peter McHugh

Low-intensity functional electrical stimulation can increase multidirectional trunk stiffness in able-bodied individuals during sitting
Original Research Article
Pages 777-782
Albert H. Vette, Noel Wu, Kei Masani, Milos R. Popovic

Individual and combined effects of OA-related subchondral bone alterations on proximal tibial surface stiffness: a parametric finite element modeling study
Original Research Article
Pages 783-791
Morteza Amini, S. Majid Nazemi, Joel L. Lanovaz, Saija Kontulainen, Bassam A. Masri, David R. Wilson, Walerian Szyszkowski, James D. Johnston

Comparison of trunk muscle forces, spinal loads and stability estimated by one stability- and three EMG-assisted optimization approaches
Original Research Article
Pages 792-800
Yousef Mohammadi, Navid Arjmand, Aboulfazl Shirazi-Adl

Carotid plaque elasticity estimation using ultrasound elastography, MRI, and inverse FEA – A numerical feasibility study
Original Research Article
Pages 801-807

Technical Notes

Comparisons of node-based and element-based approaches of assigning bone material properties onto subject-specific finite element models
Pages 808-812
G. Chen, F.Y. Wu, Z.C. Liu, K. Yang, F. Cui
Anatomical calibration for wearable motion capture systems: Video calibrated anatomical system technique
Pages 813-819
Maria Cristina Bisi, Rita Stagni, Alessio Caroselli, Angelo Cappello

Trade-off between stress shielding and initial stability on an anatomical cementless stem shortening: in-vitro biomechanical study
Pages 820-825
Go Yamako, Etsuo Chosa, Koji Totoribe, Shinji Watanabe, Takero Sakamoto

Communications

Early detection of abnormal left ventricular relaxation in acute myocardial ischemia with a quadratic model. Med Eng Phys 2014;36(September (9)):1101–5 by Morimont et al.
Page 826
Charles S. Chung, Leonid Shmuylovich, Sándor J. Kovács

Re: Chung et al.’s Letter to the Editor in response to: Early detection of abnormal left ventricular relaxation in acute myocardial ischemia with a quadratic model. Med Eng Phys 2014;36(September (9)):1101–5 by Morimont et al.
