**Physiological Measurement**

Volume 35       Number 2       February 2014

**EDITORIAL**

93  The modern age of Physiological Measurement  
J Randall Moorman

**PAPERS**

95  Miniature ambulatory skin conductance monitor and algorithm for investigating hot flash events  
Dennis E Bahr, John G Webster, Deborah Grady, Fredi Kronenberg, Jennifer Creasman,  
Judy Macer, Mark Shults, Mitchell Tyler and Xin Zhou

111 The human ear canal: investigation of its suitability for monitoring photoplethysmographs and arterial oxygen saturation  
K Budidha and P A Kyriacou

129 Intermonitor reliability of the GT3X+ accelerometer at hip, wrist and ankle sites during activities of daily living  
Cemal Ozemek, Monica M Kirschner, Brittany S Wilkerson, Wonwoo Byun and Leonard A Kaminsky

139 Evaluation of postural steadiness before and after sedation: comparison of four nonlinear and three conventional measures  
A Tietäväinen, E Høggstrøm and J E Mandel

153 Determination of the amplitude and phase relationships between oscillations in skin temperature and photoplethysmography-measured blood flow in fingertips  
A A Sagaidachnyi, A V Skripal, A V Fomin and D A Usanov

167 Inertia based functional scoring of the shoulder in clinical practice  
R J P Körver, I C Heyligers, S K Samijo and B Grimm

177 In vitro estimation of pressure drop across tracheal tubes during high-frequency percussive ventilation  
M Ajčević, U Lucangelo, M Ferluga, W A Zin and A Accardo

189 Measuring skin temperature before, during and after exercise: a comparison of thermocouples and infrared thermography  
Alex de Andrade Fernandes, Paulo Roberto dos Santos Amorim, Ciro José Brito, Anselmo Gomes de Moura, Danilo Gomes Moreira, Carlos Magno Amaral Costa, Manuel Sillero-Quintana and João Carlos Bouzas Marins

205 Effects of body mass index on gastric slow wave: a magnetogastrographic study  
S Somarajan, S Cassilly, C Obsioha, W O Richards and L A Bradshaw

217 Real-time gastric motility monitoring using transcutaneous intraluminal impedance measurements (T1IM)  
M D Poscente, G Wang, D Filip, P Ninova, O Yadid-Pecht, C N Andrews and M P Mintchev

231 Changes in the electrical properties of the electrode–skin–underlying tissue composite during a week-long programme of neuromuscular electrical stimulation  
S I Birllea, P P Breen, G J Corley, N M Birllea, F Quondamatteo and G ÓLaighin

253 Improvement of energy expenditure prediction from heart rate during running  
Keyne Charlot, Jérémy Cornolo, Rachel Borne, Julien Vincent Brugniaux, Jean-Paul Richelet,  
Didier Chapelot and Aurélien Pichon

(Continued on inside back cover)

Bibliographic codes
CODEN: PMEAE3 35 (2) 93–322, N11–20 (2014)    ISSN: 0967-3334
267 Electrical impedance of mouse brain cortex in vitro from 4.7 kHz to 2.0 MHz
M T Wilson, M Elbohouty, L J Voss and D A Steyn-Ross

283 Assessment of speed distribution of red blood cells in the microvascular network in healthy volunteers and type 1 diabetes using laser Doppler spectra decomposition
S Wojtkiewicz, E Wojcik-Sosnowska, M Jasik, R Maniewski, W Karnafel and A Liebert

297 Technological assessment of the biogalvanic method for tissue characterization
J H Chandler, A Hood, P R Culmer, D Jayne and A Neville

309 Heart rate variability at limiting stationarity: evidence of neuro-cardiac control mechanisms operating at ultra-low frequencies
A C Fisher, D Groves, A Eleuteri, P Mesum, D Patterson and P Taggart

NOTE

N11 The influence of carbon monoxide bolus on the measurement of total haemoglobin mass using the optimized CO-rebreathing method
G Turner, J S M Pringle, S A Ingham, B W Fudge, A J Richardson and N S Maxwell
